## **Chapter 6**

### **Concluding Remarks**

#### **Overall Assessment of Performance of the Last year and Key Target for the Next Year**

The teachers and the employees showed creativity and innovative skills in continuing academic and official activities in the changed pandemic situation. They showed quick adaptability and communicative skills too. The all these are the part of their accountability with the profession. They also developed problem solving and inter personal skills.

If the pandemic situation continues, we must carry on the technology-assisted programs to ensure the virtual attendance, punctuality, productivity of quality work, mutual cooperation, coaching and training skills and so on.

We will arrange more in-house training programs, national and international webinars, cultural competition on virtual platforms, awareness programs and so on.

Evaluation systems will be introduced to ensure the professional commitment of the teachers and the employees as well.

With the development of pandemic situation, programs of virtual platform should be minimized and classroom based activities should be restored as it were previously.

#### **Key Challenges and Risks for the College**

Risk Factors:

- Lack of motivation for academic performance
- Changing negative attitude to positive
- Help to boost up self-respect and level of confidence
- Reducing psychological problems
- Reducing under preparation for academic

feedback Key Challenges:

- Overcoming the academic loss during COVID-19 period
- Enhancing classroom performance
- Setting up technology based classrooms
- Developing behavioral pattern and cultural attitude
- Increasing guardians involvement
- No student should be left behind

#### **Recommendations**

As we have the successfully overcome the pandemic situation of COVID-19, we should have to increase technological facilities, such as Wi-Fi access for both of the teachers and students. In the periphery where Wi-Fi access is not easy students should be provided with mobile data facilities almost free of cost. Effective online examination system should be innovated. Teachers and officials' efficiency should be increased in technological fields by imparting training programs. They should be encouraged to be technology savvy. Some activities should be conducted by maintaining physical distance and health issues.
