Chapter:01
Living Things and Environment

1. Competency Based Questions :

a. How have humans changed environment? Write five sentences about it.

Ans: Environmental changes can be caused by natural disasters and human activities. Human have been cutting down trees to use as fuel or building materials. They have cleared forests for land to cultivate crops or livestock for food and to build houses, roads, and factories. Human is also changing an environment to get natural resources.

b. What will happen to the green grasses if we put a brick on them for some days? Why?

Ans: Plants need air, light to grow. If we put a brick on the green grasses it will be yellow colour of its leaves and stems. Because, all living beings need certain temperature and light for living. Lacking of sunlight and temperature it becomes yellow. It is not growing well. So, plants need sunlight, water and air to growing well.

c. Write five differences between habitat and shelter?

Ans: The differences between habitat and shelter are given below:

Habitat	Shelter
1. A habitat is the natural home.	1. A shelter is the artificial home.
2. Habitats consist of both the biotic and non-biotic factors that found in the environment.	2. Maximum time shelter consist a of biotic factors.
3. It is the part of natural environment.	3. It is the part of habitat.
4. It provides the organisms that live there with food, water , shelter and space to survive.	4. It provides with protection by shelters.
5. It is the permanent condition of living.	5. It is the temporary condition of living.
